

soncli.mcs: An After-Market Open-Source Enabler

An Evolutionary Bridge

From Nokia EdenNet SON to O-RAN Management and More

Neda Communications, Inc.

Summary

Act I: An After Market Story.

Vendor & Product

- Nokia EdenNet SON

Customers & Users

- T-Mobile, BT, Orange, Telstra, NTT DOCOMO, ...

Gap & Our Offerings

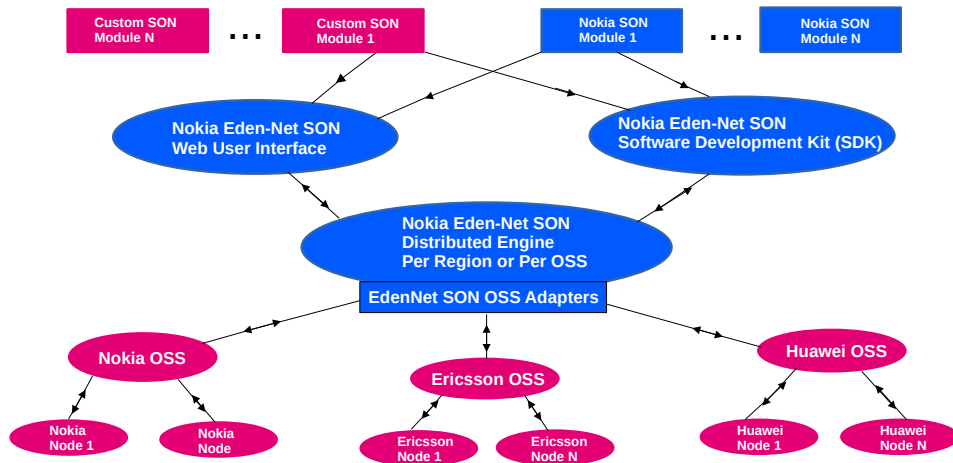

- soncli.mcs – A CLI Interface for Running SON Modules

Act II: With BISOS-MaTOOF

Extend EdenNat SON Into the Broader Systems Management Domain

- Provide a Web UI for Parallel Execution of Modules with soncli.mcs
- Using a General Purpose Internet Services OS (BISOS) make the concept of Modules and Targets Oriented Open Framework (MaTOOF) Universal – Targets need not be limited to what Nokia supports.

Abstract Nokia EdenNet SON Ecosystem

Abstract Nokia EdenNet SON Parts List

Nokia EdenNet SON Parts List

- SON Modules
- SON Python API
- SON Software Development Kit (SDK)
- SON Web User Interface
- SON Execution Engine
- SON OSS Interface Adapters

soncli.mcs Relevant Parts

- SON Modules
- SON Python API
- SON Software Development Kit (SDK)

Breaking the Telecoms Walled Garden Model

With Open Python

Traditional Telecom Model is the Walled Garden.
The Telecom Walled Garden Model is rooted in:

- Secrecy – NDAs
- Telecom Companies are accustomed to the Proprietary Model of Being Exclusively Milked
- Intellectual Property Rights Regime
- Proprietary Nokia, Ericson, Cisco, etc Milk it

What we are Doing Here is Completely Open.

Genuinly Open. Based on:

- Real Open Nature of Python
- Rejection of IPR with Affero GPL

Abiding by the Invalid Intellectual Property Rights Regime

Confidentiality

This presentation contains no confidential or proprietary information and is based entirely on publicly available sources.

Publicly Known List of Nokia SON Clients

AI and Google Say: “Based on public announcements and reports, the following telecom companies use or have used Nokia EdenNet SON:”

- **Telstra** (Australia)
- **Orange** (Global/Europe/MEA)
- **Vodafone Idea** (India)
- **Telecom Argentina**
- **T-Mobile USA**
- **BT (EE)** (UK)
- **NTT DOCOMO** (Japan)

And probably many other telecom companies that have not been publicly disclosed.

Publicly Known List of Nokia SON Clients

Audiance	Telecom Operator	Internet Provider
Nokia SON Modules Developer:	X X X X X	— — —
Nokia SON Modules User:	X X X X X	— — —
O-RAN Management:	X X	X X X
Common Systems Management:	X X X	X X X

Strength and Weaknesses of the Nokia SON Architecture

Strength:

- Choice of Python (12 years ago)
- Modules Architecture for RAN Systems Management
- Targets Architecture for Cells
- Python API for Sys Mgmt Abstractions

Weaknesses:

- Jailed in the Telecom Walled Garden
- Abstraction of Targets is Limited to Cells
- Limited in Scope to RAN and Telecom
- Limited to a single Modules Player (Web-UI)
- No CLI for Modules Execution

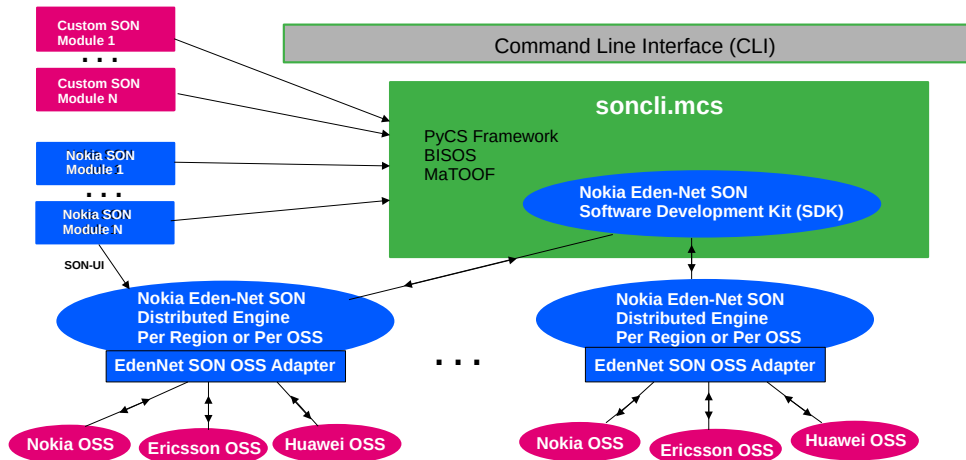

With soncli.mcs We Can Liberate Modules and Targets

- Inside of the Telecom Walled Garden Open Up and Extend EdenNet SON
- Profit from the Nokia SON Experience of “Modules and Target Oriented Open Framework” (MaTOOF) for Systems Management Outside of the Telecom Walled Garden

soncli.mcs – The Enabler and the Bridge

- 11 soncli.mcs – An After-Market Enabler and the Bridge
- 12 Immediate and Tangible Benefits of soncli.mcs
- 13 soncli.mcs As An Agentic AI Enabler

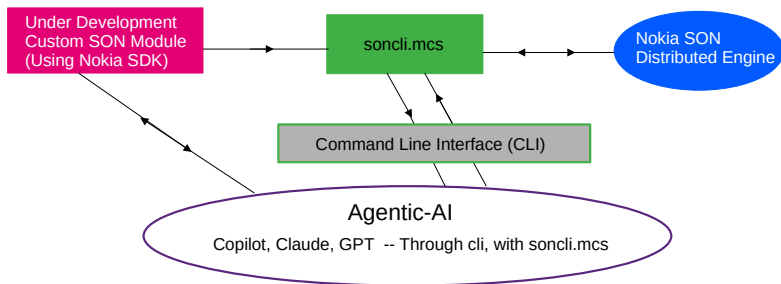

soncli.mcs -- An After-Market Strategy for Nokia EdenNet SON Development & Deployment

Immediate and Tangible Benefits of soncli.mcs

Nationwide reporting

Agentic-AI Needs a CLI soncli.mcs as an Agentic-AI Facilitator

Using the BISOS Web-UI csPlayer with soncli.mcs

- 14 Expectation Complete CSXUs
- 15 About The BISOS Web-UI-csPlayer

Immediate and Tangible Benefits of soncli.mcs

Nationwide reporting

Immediate and Tangible Benefits of soncli.mcs

Nationwide reporting

Brining soncli.mcs Into the BISOS-MaTOOF and csPlayer Framework

- 16 soncli.cs: A Bridge Into the BISOS/ByStar Environment
- 17 Adding soncli.mcs to the Broader BISOS Systems Management Framework
- 18 Modules and Targets Oriented Systems Management

Immediate and Tangible Benefits of soncli.mcs

Nationwide reporting

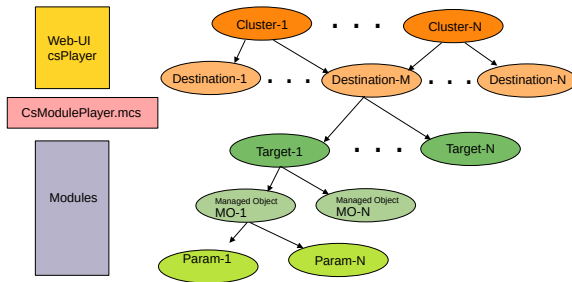

Adding soncli.mcs to the Broader BISOS Systems Management Framework

Nationwide reporting

Modules and Targets Oriented Systems Management

MaTOOF – Modules and Target Oriented Open Framework

Requested From You

Our Sales Pitch

19 Requested From You

Our Sales Pitch:

- Adding soncli.mcs to Your Existing Nokia SON EdenNet SON Is Big Bang For the Buck
- What We Are Offering Is Real
- What we Are Saying Makes Sense.
- After Having Adopted soncli.mcs, the Rest of The Benefits Will Become Obvious

Our Requests From You:

- Devote the Time and Energy Needed to Understand What We Are Saying
- Pass It Along. This is All Public. Create Consensus.
- Do Your Due Diligence. Try Out the Mentioned Offerings.
- Reachout to Us.
